

# Desalination Markets 2010

<b>Publication information</b>	<b>ii</b>
<b>Foreword</b>	<b>iii</b>
<b>Executive summary</b>	<b>iv</b>
Capital expenditure by category, 2010	v
Top 15 desalination markets, 2007-2016	v
Unit conversion factors used in this publication	vi
<b>1. Introduction to desalination</b>	<b>1</b>
1.1 Defining desalination	1
Figure 1.1 Desalination market: Contracted desalination capacity by feedwater category	1
1.2 Desalination processes	1
1.2.1 Multi-Stage Flash (MSF) desalination	1
Figure 1.2 Multi-Stage Flash desalination	2
Figure 1.3 MSF plant cost vs. capacity (with fixed gain output ratio)	3
Figure 1.4 MSF unit size trend: selected plants since 1990	3
1.2.2 Multi-Effect Distillation (MED)	4
Figure 1.5 The Multi-Effect Distillation desalination process with thermal vapour compression	4
Figure 1.6 The Multi-Effect Distillation desalination process with mechanical vapour compression	4
1.2.3 Reverse Osmosis (RO)	5
Figure 1.7 The Reverse Osmosis desalination process	5
1.2.4 Electrodialysis (ED)	5
Figure 1.8 The Electrodialysis desalination process	6
1.2.5 Hybrid models	6
1.3 Process comparison	6
Figure 1.9 Desalination process comparison	6
1.3.1 Reverse osmosis	7
Figure 1.10 The largest SWRO plants drawing feedwater from the Gulf	8
1.3.2 MSF desalination	8
1.3.3 MED desalination	9
Figure 1.11 The top ten MED plants by capacity in the world (by contract date)	9
1.4 Desalination process trends	10
Figure 1.12 Trends in desalination process technology contracted since 1980	10
Figure 1.13 Market share by process technology contracted since 2000	10
1.5 Research directions	11
1.5.1 Nano-engineered membranes	11
1.5.2 Carbon nanotubes	11
1.5.3 Aquaporins	12
Figure 1.14 Passage of water molecules through aquaporin	12
1.6 Other processes	13
1.6.1 Membrane distillation	13
Figure 1.15 Four common configurations of membrane distillation	14
1.6.2 Forward osmosis	15
Figure 1.16 Fresh water production using forward osmosis	16
1.6.3 Hybrid arrangement	16
Figure 1.17 Hybrid FO - RO arrangement	16
Figure 1.18 Power production using pressure retarded osmosis	17
1.6.4 Technology ratings	17
Figure 1.19 Desalination technology ratings	18
1.7 Other areas of innovation	19
<b>2. Market drivers</b>	<b>20</b>
2.1 The crisis of water scarcity	20
2.2 Understanding water scarcity	21
Figure 2.1 World renewable water availability	21

Figure 2.2 World water availability, 2025	21
Figure 2.3 Water scarcity dynamics	22
2.3 Water demand	22
Figure 2.4 Water withdrawals, 1905-2015	22
Figure 2.5 Water withdrawals relative to world population	23
Figure 2.6 Global water withdrawal by sector	23
2.4 Agricultural demand	23
Figure 2.7 Percentage increase in land under irrigation since 1961	24
Figure 2.8 The dynamics of water use, 1900-2025	24
2.5 Industrial demand	24
2.6 Domestic demand	25
Figure 2.9 Per capita domestic water demand, 1950-2025	25
2.7 Water supply	25
Figure 2.10 The 10 countries with the lowest natural renewable water resources	26
2.8 Global warming	26
2.9 Demand management	27
Figure 2.11 The virtual water content of some common products	27
2.10 Water tariffs	28
Figure 2.12 Global water tariffs	29
2.11 Water efficiency	32
Figure 2.13 Unaccounted-for water in the Middle East region	32
2.12 Demand management summary	32
2.13 Supply management	33
2.14 Water transport	33
Figure 2.14 Major international water transfer projects	33
<b>3. Desalination finance</b>	<b>34</b>
3.1 The cost of desalination	34
Figure 3.1 Water price from selected reverse osmosis projects, 1991-2003	34
Figure 3.2 Water prices from desalination projects since 2003	35
Figure 3.3 Water prices from desalination projects since 1991	35
Figure 3.4 Relative operating costs of the main desalination processes	37
Figure 3.5 Energy consumption trends in reverse osmosis	38
Figure 3.6 Reverse osmosis energy consumption trends: plant by plant data	38
Figure 3.7 Average relative EPC cost per m <sup>3</sup> of the main desalination processes (large plants)	39
Figure 3.8 Segmental RO capital costs	40
Figure 3.9 Segmental MED capital costs	40
Figure 3.10 Segmental MSF capital costs	40
Figure 3.11 Desalination plant capacity cost trends: plant by plant data	41
Figure 3.12 Reverse osmosis capacity cost trends, 1997-2010	43
3.2 Why has the cost of desalination apparently risen?	43
3.3 Price sensitivity	44
Figure 3.13 Income versus installed capacity in Gulf countries	44
3.4 Financing desalination	44
Figure 3.14 Proposed desalination capacity by delivery mechanism, plants over 5,000 m <sup>3</sup> /d	46
Figure 3.15 Large project delivery mechanism by country	46
Figure 3.16 BOO/BOT desalination capacity by developer market share	47
