

# Water for onshore oil and gas

---

## **Chapter 1: Introduction**

Overview of general trends in oil and gas industry, drivers and market forecast

## **Chapter 2: Shale gas/Tight oil**

2.1. Global overview

2.1.1 Production and reserves

2.1.2 Hydraulic fracturing

2.1.3 Produced water

2.2. United States

2.2.1 Market overview

2.2.2 Market drivers

2.2.3 Regulations

2.2.4 Fracturing fluids

2.2.5 Produced water treatment

2.2.6 Produced water management

2.2.7 Procurement process

2.2.8 Supply chain analysis

2.2.9 Market forecast

2.3. International shale plays

## **Chapter 3: Coalbed methane**

3.1. Global overview

3.2. Coal seam gas in Australia

3.2.1 Market overview

3.2.2 Market drivers

3.2.3 Regulations

3.2.4 Queensland

- 3.2.5 New South Wales
- 3.2.6 Produced water treatment
- 3.2.7 Produced water management
- 3.2.8 Procurement process
- 3.2.9 Supply chain analysis
- 3.2.10 Market forecast
- 3.3. International coalbed methane production

## **Chapter 4: Heavy oil**

- 4.1. Global overview
- 4.2. Canada
  - 4.2.1 Market overview
  - 4.2.2 Market drivers
  - 4.2.3 Regulations
  - 4.2.4 Produced water treatment
  - 4.2.5 Procurement process
  - 4.2.6 Supply chain analysis
  - 4.2.7 Market forecast
- 4.3. International heavy oil activities

## **Chapter 5: Conventional oil and gas production**

- 5.1. Overview of the largest markets in conventional oil and gas
- 5.2. Water requirements for enhanced oil recovery
- 5.3. Produced water treatment
- 5.4. Produced water management
- 5.5. Procurement process
- 5.6. Supply chain analysis
- 5.6. Market forecast
