

Global Water Intelligence Market Insight: Malaysia

Publication information	ii
Executive summary	iii
Opportunities	iii
Regulations	iii
Accompanying spreadsheets and datasets	iv
Forecast categories	v
Utility and industrial forecast category definitions	v
Indicators of utility service coverage	vii
Indicators of water service coverage	vii
Indicators of wastewater service coverage	vii
Other market reports from Global Water Intelligence	viii
Country market reports	viii
Primary research reports	viii
Other reports	viii
Consulting services	viii
1. Malaysia – Market	1
1.1 Overview of indicators	1
Figure 1.1 Population projections, 2010–2020	1
Figure 1.2 Economic indicators	1
1.2 Context and overview of challenges	1
1.3 Water sector organisation and structure	1
1.3.1 Government ministries and agencies	2
Figure 1.3 Government ministries and agencies	3
1.3.2 Water and wastewater service providers	3
1.3.2.1 Water service providers	3
Figure 1.4 Water supply providers in Malaysia by state	4
1.3.2.2 Wastewater service providers	5
1.4 Government’s water strategy	5
1.4.1 10 th Malaysia Plan (2011–2015)	5
Figure 1.5 Government strategy for the water services industry in Malaysia	5
1.4.2 National Water Resources Policy (NWRP)	6
1.4.3 Wastewater strategy	6
1.4.4 Water and wastewater projects within the Economic Transformation Programme	6
1.5 Water availability and demand	7
1.5.1 Water availability	7
Figure 1.6 Water resource availability in Malaysia by state	7
1.5.2 Sectoral water demand	8
Figure 1.7 Projected sectoral water demand for Malaysia, 2010–2050	8
Figure 1.8 Breakdown of water demand by sector, 2010–2050	8
1.6 Municipal water and wastewater	8
Figure 1.9 Water supply indicators	9
Figure 1.10 Wastewater indicators	9
1.6.1 Water treatment	10
1.6.1.1 Metered water consumption and NRW	10
Figure 1.11 Metered domestic and non-domestic consumption, 2007–2011	10
Figure 1.12 Volume of water feeding the system and percentage of NRW by state, 2011	11
Figure 1.13 Breakdown of water supply network by types of pipe, 2011	12
1.6.1.2 Water treatment capacity	12
Figure 1.14 Water treatment design and operational capacity by state, 2011	13
Figure 1.15 Projected potable water demand for 2020 vs WTP design capacities as of 2011	13
Figure 1.16 Major WTPs in Malaysia	14
1.6.1.3 Water treatment in Selangor	14
1.6.2 Desalination	15
1.6.3 Wastewater treatment	15

Figure 1.17 Wastewater services for Peninsular Malaysia, 2011	15
Figure 1.18 Public STPs in Peninsular Malaysia by type, 2011	15
Figure 1.19 Distribution of STPs by state, 2010	16
Figure 1.20 Number of STPs for the connected wastewater facilities by capacity, 2011	16
Figure 1.21 Major WWTPs in Malaysia	17
1.6.4 Water reuse	17
1.7 Water finance	17
1.7.1 Funding sources	17
1.7.1.1 Tariffs	18
Figure 1.22 Average domestic water tariffs for the first 35 m ³ in Malaysia, 2009–2012	18
Figure 1.23 Structure of wastewater tariff in Malaysia by type of customer, 2012	18
1.7.2 Capital expenditure	19
1.7.2.1 Capital expenditure in the water sector	19
Figure 1.24 Schedule of proposed water supply projects in Malaysia and estimated costs, 2010–2050	19
Figure 1.25 Water supply projects in Malaysia until 2050 by state	20
1.7.2.2 Capital expenditure in the wastewater sector	20
Figure 1.26 Capital investments in wastewater sector in Peninsular Malaysia, 2008–2011	20
Figure 1.27 Capital investments in the wastewater sector according to federal programme	21
1.7.3 Operating expenditure	21
Figure 1.28 Total operating costs, total expenditure and revenues in the water sector, 2010–2011	21
Figure 1.29 Evolution of total expenditure and revenue in the water sector, 2007–2011	21
Figure 1.30 Total operating costs, total expenditure and revenues in the wastewater sector, 2010–2011	22
Figure 1.31 Evolution of total expenditure and revenue in the wastewater sector, 2007–2011	22
1.8 Private sector participation	22
Figure 1.32 Summary of PPI projects in Malaysia	23
1.9 Procurement process for water and wastewater infrastructure	23
1.9.1 Procurement procedures	24
1.9.2 Procurement requirements	24
Figure 1.33 Registration requirements for supply chain companies in Malaysia	24
Figure 1.34 PKK classes for civil work contractors	24
1.9.3 Procurement stages	25
1.9.3.1 Tender	25
Figure 1.35 Procurement process of Malaysia	26
1.9.4 Procurement models	26
1.10 Supply chain	26
1.10.1 Consulting engineers	26
1.10.2 Contractors	27
Figure 1.36 Major EPC contractors active in more than one sector of the supply chain in Malaysia	28
1.10.3 Private operators	29
1.10.3.1 Selangor case	29
1.10.4 Equipment suppliers	30
1.11 Current and future key projects	31
1.11.1 Current projects	31
Figure 1.37 Water supply projects under the 10 th Malaysia Plan for the period 2011–2012	31
Figure 1.38 Current projects in the Malaysian water industry	31
1.11.2 Future projects	32
Figure 1.39 Future projects in the Malaysian water industry	32
1.12 Future market directions	32
1.12.1 Overview	32
1.12.2 Notes on the market forecast	32
1.13 Market forecast	33
Figure 1.40 Market forecast, 2011–2018	33
Figure 1.41 Market forecast breakdown, 2013	34
Figure 1.42 Market forecast data, 2011–2018	35
Figure 1.43 Industrial markets, 2013–2017	36
2. Malaysia – Regulations	37
2.1 Regulatory framework for drinking water, wastewater discharge and reuse	37
2.1.1 Main government bodies	37
Figure 2.1 Government bodies: Drinking water, wastewater discharge and reuse regulation in Malaysia	37

2.1.2 Relevant legislation	38
Figure 2.2 Laws that affect the responsibilities of organisations involved in drinking water and wastewater discharge standards	38
2.2 Drinking water quality regulations	38
2.2.1 Drinking water quality standards	38
Figure 2.3 Specifications for drinking water parameters and monitoring frequency, according to the NSDWQ (2004 update)	39
2.2.2 Implementation of regulations and compliance	42
Figure 2.4 Drinking water quality monitoring schedule	42
2.2.3 Future plans	42
2.3 Municipal and industrial wastewater quality regulations	42
2.3.1 Wastewater quality regulations	42
2.3.1.1 Wastewater discharge standards	43
Figure 2.5 Specifications for municipal wastewater parameters (facilities built after the 2009 revised regulations came into force)	43
Figure 2.6 Specifications for municipal wastewater parameters (existing wastewater treatment systems approved after January 1999)	43
Figure 2.7 Specifications for municipal wastewater parameters (existing wastewater treatment system approved before January 1999)	43
Figure 2.8 Specifications for industrial wastewater and mixed effluent parameters	44
Figure 2.9 COD standards for discharge of industrial effluent by industry	44
2.3.2 Implementation of regulations and compliance	45
Figure 2.10 Discharge fee for sewage treatment systems constructed before 2009, and after 2009	45
Figure 2.11 Discharge fee for industrial effluent	46
2.3.3 Monitoring and sampling	46
2.3.4 Wastewater treatment technology in Malaysia	47
2.3.5 Sewage sludge regulations	47
2.3.6 Future plans	47
2.4 Water reuse regulations	47
2.4.1 Current regulatory framework	47
2.4.1.1 Water quality standards for surface water	48
Figure 2.12 Water use classes in the National Water Quality Standards	48
Figure 2.13 National water quality standards for surface water	48
2.4.2 Implementation of regulations and compliance	50
2.4.3 Future plans	50
2.5 Water in industry: Oil & Gas	51
2.5.1 Organisations that influence water policies	51
2.5.2 Regulations relating to the oil industry	51
2.6 Future regulatory scenario and conclusions	52
2.7 List of laws, standards and policies	52
2.8 Glossary	53
3. Malaysia – Utilities	54
